ICT
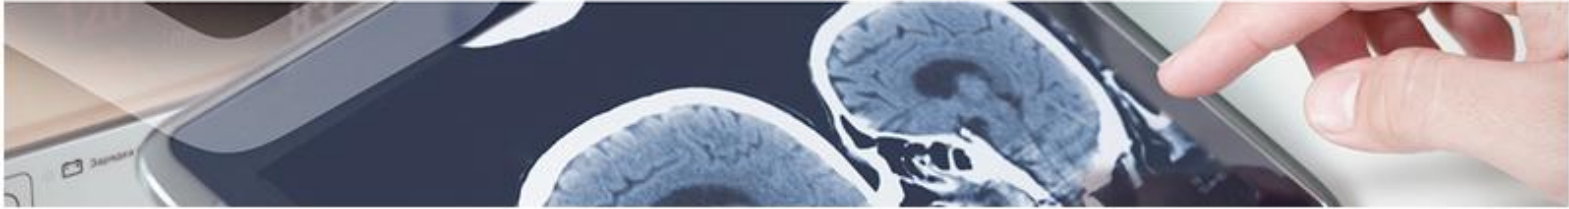

Risk Map

An Andalusian research group has developed a manual for use of the software application to help Clinical Management Units (CMU) to manage risks to patient safety in health care.

Oficina de
TRANSFERENCIA DE TECNOLOGÍA
Sistema Sanitario Público de Andalucía

Description

This manual is basically graphic and describes the possible access from the home screen to the various options available.

This application takes as reference for the UNE 179003:2010.

Aims

The research group seeks to establish licensing agreements and / or collaboration.

Advantanges

It allows:

1-   Have a Risk Map for Areas (hospitalization, surgery, ...) of the CMU.

2-   Conduct an assessment of risks to estimate the level of risk (low, moderate, high and extreme).

3-   Manage Risk proposing control measures

Classification

Area: ICT

Intellectual Property

The present invention is protected by intellectual property registration, including source code and associated algorithm.
